🏠 GREATER NOIDA

PROFILE

Analytical and detail-oriented Data Analyst with strong skills in Excel, SQL, Python (Pandas, NumPy, Matplotlib), and Power BI. Completed a 3-month internship at Prodigo SoftTech as a Data Annotation & Analyst Intern, working on data cleaning, labeling, and visualization to support AI/ML projects. Experienced in transforming raw data into clear, actionable insights and building interactive dashboards to aid business decision-making.

EXPERIENCE

PRODIGO

DATA ANNOTATION AND ANALYST INTERN

MAY 2025 - JULY 2025

- Annotated and validated large datasets to enhance AI/ML model performance.
- Conducted data cleaning, preprocessing, and exploratory analysis using Python, SQL, and Excel.
- Ensured data accuracy and consistency, supporting high-quality labeled datasets.
- Created reports and visualizations to track efficiency and highlight insights.

DEMAND X

PRODUCT OPS INTERN

JUNE 2025 - AUGUST 2025

- Supported product operations by managing data, documentation, and workflow tracking to ensure smooth execution.
- Assisted in gathering and analyzing product performance metrics to identify trends and improvement areas.
- Collaborated with cross-functional teams (product, sales, and tech) to streamline operational processes.
- Contributed to product research and competitive benchmarking to support decision-making.

CERTIFICATION

- **Tata Consultancy Services** – Data Visualization (Forage): Created executive dashboards and prepared client-facing insights to support decision-making.
- **Deloitte Australia** – Data Analytics (Forage): Built Tableau dashboards, applied Excel classification, and drew business conclusions.
- **BCG** – Data Science (Forage): Conducted churn analysis with Python (Pandas, NumPy), optimized a random forest model (50% recall), and delivered an executive summary.
- **One Roadmap** – Data Analyst Certificate: Trained in SQL, Python, Excel, Power BI, and data visualization techniques.

SKILLS

Programming : Python (Pandas, NumPy, Matplotlib, Seaborn), SQL

Machine Learning: Scikit-Learn, Tensor flow, Data Preprocessing

Data Tools: Tableau, Power BI, Excel, Web Scraping, Lead Generation, Data visualization and Presentation

PROJECTS

- **Fraud Detection:** Built and deployed a machine learning model to identify fraudulent transactions using Python (Pandas, Scikit-learn). Improved detection accuracy by implementing feature engineering, data preprocessing, and hyperparameter tuning. Generated visual reports to highlight fraud patterns and support decision-making.
- **Breast Cancer Detection:** Applied classification algorithms (Logistic Regression, Random Forest, and SVM) to predict cancer diagnoses from medical datasets. Conducted data cleaning, handled missing values, and performed feature selection to achieve high precision and recall.
- **Air Quality Index Analysis:** Collected and analyzed environmental datasets to monitor AQI trends across regions.
- **Employee Data Visualization:** Designed interactive dashboards to analyze workforce demographics, performance metrics, and employee retention. Used Excel, Power BI, and Python (Matplotlib, Seaborn) to uncover trends, highlight skill gaps, and support HR strategy.
- **Heart Disease Prediction:** Developed predictive models using Logistic Regression and Decision Trees to assess heart disease risk from patient datasets.

EDUCATION

GALGOTIAS UNIVERSITY Aug 2022 - Aug 2026

- Bachelors In Technology (CSE Core)

SUNBEAM ENGLISH SCHOOL BHAGWANPUR

- High school
- Secondary high school

ADDITIONAL INFORMATION

- **Additional skills:** Various AI tools, Microsoft Office Applications, Canva
- **Soft Skills:** Communication, Collaboration, Time Management, Adaptability, Critical Thinking, Problem Solving
- **Languages:** English, Hindi
